DETAILED ACTION

Receipt is acknowledged of the request for continued examination filed 04/13/2009.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,3,4,6-9, 11-24, 27-28 and 32-47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims contain added language which is not supported by the original specification. In particular “a reservoir having a volume of active agent”. According [0097], the reservoir is filled with cells which produce the bioactive, not a “volume of bioactive. This is considered new matter. Correction is requested.

Having reviewed the specification, no support could be found for “the core is in fluid communication with the reservoir”. This is considered new matter. Correction is requested.

Rejoinder of the claims will be considered once the claims are in condition for allowance. Even so, applicant can expect at least one more action on these claims since they have never been examined.
